Drive better business results through better learning experiences.

Smart assessments for smarter learning

Learnosity

Who we are

Learnosity provides the assessment infrastructure powering more than 130 of the world's leading learning platforms and publishers. Serving over 40 million learners across the corporate training, adult and vocational learning, K-12, and higher ed markets, Learnosity's suite of cloud-based APIs enable cutting-edge assessments, faster time-to-market, and lower development costs. Learnosity is headquartered in Dublin, Ireland with a significant R&D team in Sydney, Australia, and a US office in New York.

Global innovators build with Learnosity

High performance at any scale

164m	17.32b	99.97%

Our expertise
Assessment building is a solved problem

Building high-quality learning products isn't easy. We've spent years developing a suite of powerful assessment tools that help simplify the process.

Fully customizable
Our flexible APIs give developers the scope they need to build any kind of assessment for any type of device.

Ready for market
Accelerate product development using powerful, polished, and reusable assessment components.

Cost effective
Using Learnosity dramatically reduces in-house development costs and the associated expenses of maintenance and hosting.

Accessibility built-in
All our products are designed with WCAG AA, ADA, and Section 508 guidelines in mind.

Reliable
Consistent 99.97% platform availability and secure encryption means you can plan your assessments with confidence.

How we help Corporate Training
Digital assessments for the modern workforce

Screen candidates, onboard new hires, or upskill
teams more efficiently with web-based technology
that's interactive, responsive, and fully customizable.

Ask better questions with our technology-enhanced items
Select from a wide range of feature-rich question types that
better identify learners' needs and accelerate skills training.

Understand employee progress
Customize reports to keep track of individual, team, or company-wide
performance in the metrics that matter.

Evolve with your teams
With 50+ engineers shipping 1000+ product enhancements per year,
we make sure your product always stays at the cutting edge.

Manage your training assets
Our cloud-based technology makes it easy to keep your content
organized, searchable, and reusable no matter where you are.

Customize the learning experience
Our API-based technology puts you in control so you can create
bespoke assessment experiences for your teams.

Learnosity Questions

Learnosity Author
An unrivaled authoring experience

Learnosity Author gives content creators the tools and features they need to easily compose, customize, and manage assessment content in any subject, at any level.

## Engage more learners, more easily

For Educators

- Purpose-built author interface simplifies the entire content creation process.

- Fully customizable – tailor layouts, or remove and add features as needed.

- Embed video, audio, or interactive animations to your assessment content.

- Easily categorize content for rapid organization, browsing, and retrieval.

For Professional Content Creators

- Highly intuitive authoring experience helps save time and increase productivity.

- Easy-to-use WYSIWYG editor offers endless scope for customization.

- Default question templates allow for quick and easy content creation.

- Components seamlessly slot into any authoring platform for a fluid publishing workflow.

Choosing Learnosity was one of the best decisions I made in the development of my platform.
It's saved us on development costs, while enabling powerful assessment and reporting capabilities.

SCORING...

Learnosity Analytics
Turn complexity into clarity

From tracking skills and progress to identifying points of difficulty, Learnosity Analytics plugs right into any web platform for immediate use, providing customers with a shortcut to a more effective learning product.

How Learnosity Analytics helps

Give on-the-spot assistance
Live progress reports let you keep tabs on how learners are doing in real time. Monitor, analyze, and respond to live learner interactions on every assessment.

Performance summaries at all scales
Easily set up key data touchpoints to summarize, explore, and compare a range of statistical measures across learner populations, from individual to organizational levels.

Quickly identify learner needs
Learning outcomes reporting lets you measure learner progress by topic, subtopic, or skill type, making it easy to spot trends and offer personalized support.

Optimize the assessment experience
Item analysis lets you see how learners are interacting with assessment content, allowing you to modify difficulty, layouts, and question types to improve the learning experience.

Build your own reports
Style reports to suit your needs – select events, customize metrics, create visualizations, build your own user interface, or combine Analytics' rich report data into your own.

We're serious about data security
Our clients' data is always theirs to own, access, and control. As custodians, we treat this data as if it were our own, employing high-security end-to-end encryption at rest and in transit. We do not share clients' data for any reason.

How our reports drill deeper

Our easily integrated out-of-the-box reports give you the fast-track to valuable insights. It's simple to summarize, explore, and compare a range of statistical measures across learner populations, from individual to class to large cohorts.

Individual report
Better understand a learner's needs with detailed custom reports that highlight their strengths and weaknesses and make it easier for instructors to adjust learning experiences accordingly.

	Total	Listening	Reading	Writing	Speaking
Bart Simpson					
Comprehension	78%	80%	77%	83%	50%
Fluency	64%	-	-	63%	67%
Vocabulary	78%	-	-	83%	67%
Pronunciation	50%	-	-	-	50%

Individual report

Large group report
Map growth in understanding across learner populations. Capable of drawing on data from millions of tests, large group reporting makes sense of the big picture.

Learning outcomes report
Measure candidate progress against specific course requirements with learning outcomes reporting. Detailed feedback and actionable insights make it easier for instructors to offer the additional support that learners need.

	Total	1. Algebra	2. Matrices	3. Functions and…	4. Calculus	5. Consumer arit…	6. Statistical ana…

Terri Mackleberry	79%	84%	0%	72%	-	79%	78%	

Learning outcomes report

Live progress report
From first response to final answer, live performance tracking lets you see how each learner is progressing during an assessment, and give on-the-spot assistance. Use the control panel to pause exams, extend exam time, or advance groups to specific questions.

Response analysis report
Enable educators to untangle any points of confusion for learners with an at-a-glance summary of group responses in an activity. Go big with class response overviews or go granular with breakdowns of individual learners or items.

Coursework progress report
Track the progress of a learner, or group of learners, against learning objectives, standards, or other tag-based alignments. Or build your own dashboard with our Progress Single report.

Student	Expressions & Equations	Geometry	Statistics & Probability
Brian Moser	39%	67%	70%
John Carter	63%	67%	60%

Coursework progress report

Our partnership with Learnosity enables our clients to enrich their training content using a variety of assessment question types. Our customers find it simple to add Learnosity assessments which provide them invaluable insight into how their learners are retaining their training content. The Learnosity team is incredibly responsive to our feedback and questions.

Learnosity Assessments
Build feature-rich digital assessments in less time

Whether building an LMS or looking to add an assessment engine to your learning product, Learnosity Assessments provides a range of built-in tools that helps developers hit the ground running.

Key benefits

Flexible test creation
Control how assessments look, feel, and perform. Our configurable assessment UI lets you customize the assessment experience to create powerful yet practical interfaces for all kinds of users.

Deliver content your way
Create a more engaging learning experience by seamlessly embedding standalone questions or entire assessments in your chosen environment – whether an app, learning platform, or ebook.

Engage learners of all abilities
Smart adaptive testing and branching keep assessments on the right side of challenging for all learners with question difficulty that automatically adapts to individual learner ability.

Guide learners to success
With the ability to offer hints, distractors, sample answers, and personalized feedback, educators have more options to support their learners.

Accurate scoring at scale
Enjoy flexibility in how answers are marked, from powerful automated scoring to traditional manual scoring.

10.03 billion

Rich Questions delivered
per year

Learnosity Questions
Always ask the right questions

There's no need to spend time and resources engineering complex question types because we've done it for you. With a broad range of interactive question formats to choose from, Learnosity Questions lets authors create and deliver in-depth assessment content across subjects at all levels with ease.

Key features and benefits

Select the perfect question type
From simple to sophisticated, our question types include MCQs, drag and drop, graphs and charts, chemistry, and much more. All questions are interactive, media-enabled, and mobile friendly.

Build your own question types
Customize questions to suit your specific needs. Our flexible APIs make it easy for developers to produce tailored questions that seamlessly plug back into our product suite.

Fast-track student scoring
With powerful automated scoring for most question types, our rule-based scoring engine instantly marks all your auto-scorable questions.

Pricing
Buy better to build better

We're big on adding value over cost because we know that when you grow, we grow. We offer transactional pricing so that you only pay for what you use. Building better always costs less when you buy better.
